Olive e-business Solutions Pvt. Ltd – New Delhi, India

Olive e-business is premium design firm known for its designers for over last couple of decades.

PROJECTS

Rather than covering all of my projects, here are some worthy to mention tasks/projects achieved/implemented :-

- Built a **self-service Analytics platform** for different e-commerce marketplaces. This involved handling data sourcing from different APIs, transforming into cleaner structure, enriching the same and then displaying in form of meticulously designed dashboards (used **Apache Superset**)
- Played CTO leading a small 4 member developer team on a SaaS solution related to develop a crypto and NFTs based **on-chain analytics** platform (like Nansen)
- Ported Copart web/PWA application with search and transaction capability implementation. ported from Mobile web based **React** to **React native** with a team of 7 developers
- **Getcommande** – worked as a developer on an electron based desktop app for searching across your cloud accounts. Integrated the UI with different Cloud APIs. has since been acquired by Dropbox and a similar tool "Dropbox dash" has now been launched
- **Sardius.media** - Ported the overall scheduling platform for the enterprise offering from **ExpressJS + AngularJS** to **React** and **AWS Serverless Lambdas**
- **Bringby.com** - (shutdown now) - worked on the react and flux implementation here along with API building. This was a react based Cordova app
- The most recent client projects that went live were related to 'https://www.ltxapp.com/' and 'https://localtrip.in' (a travel based activities discovering solution for Indian market) worked on the API part as well as B2B web app for inventory management on this one
- Bitcoins exchange Arbitrage solution (an electron app done for a client)
- Worked as a offshore software consulting arm of a US based startup firm **Vive Benefits** (in fintech

and insurance area). architected entire design and development journey of their 1st mobile application. Presented mobile piece of the product to all stakeholders at different times, and tweaked the solution as per the collated feedback.

- Architected a single code multiple variants of the existing application along with usage of **react-native, expo and expo-web**. Got the team needed for the same. Was an active party to the decision making discussions in the beginning.

Notable Clients: O2, GTA, Vodafone, BT, Sardius.media, Wikiwalet, Bringby, Vive Benefits, Alphastack

EDUCATION

Bachelors: Commerce, 05/2004

University of Delhi - New Delhi

Successfully completed the program in regular duration

GNIT: Computer Science And Programming, 04/2004

NIIT (National Institute of IT) - New, Delhi

Achieved an impressive score of 80% across 8 semesters. This degree coupled with my Commerce Bachelor's degree was identified as equivalent to masters degree by USCIS evaluators
